Update Changes

## Organization of pages

## Logic process

### Case 1: View Thread

**Description:** User wants to view a thread in the Tech Microsoft community

**Steps:**

1. User navigates to CareerCafe website
2. User browses communities, expands the Tech section
3. User selects the Microsoft community in the Tech section
4. User browses threads and selects one to view

### Case 2: Ban a user (Delete account done through same process)

**Description:** Admin wants to ban a user for breaking the terms of service

**Steps:**

1. User navigates to CareerCafe homepage.
2. User logs in (see case 6) to the admin account.
3. Admin clicks on own username in the header to get to user profile
4. Admin clicks on admin features in the left column.
5. Admin searches for the target user and clicks on username.
6. Admin navigates to status radio buttons, clicks on ban, selects length of ban.  
(Navigate to the Delete Account button to delete the account.)
7. Admin clicks on update changes.

### Case 3: Create Thread

**Description:** User wants to create a thread in the Tech Microsoft community

**Steps:**

1. User navigates to CareerCafe website
2. User logs in (see case 6)
3. User browses communities, selects the Tech section
4. User selects the Microsoft community in the Tech section
5. User selects create thread
6. User adds the text and image content they want
7. User selects post thread

### Case 4: Search for user

**Description:** User wants to view the profile for user with username Joe123

**Steps:**

1. User navigates to CareerCafe website
2. User types Joe123 into the search bar
3. Search bar returns all matching users in a dropdown menu
4. User clicks the user they intend to view the profile of

### Case 5: Create Account

**Description:** User wants to create an account

**Steps:**

1. User navigates to CareerCafe website
2. User selects Create Account button on nav bar
3. User inputs their personal information, username, email and uploads a profile picture
4. User selects create account

**Case 6: Login**

**Description:** User wants to login to their account

**Steps:**

1. User navigates to CareerCafe website
2. User selects Login button on nav bar
3. User inputs their email and password into the login popup
4. User selects login

**Case 7: Delete Threads and replies**

**Description:** Admin wants to delete a thread/reply.

**Steps:**

1. User navigates to CareerCafe homepage.
2. User logs in to the admin account.
3. Admin navigates to the target community.
4. Admin clicks on thread they want to delete (or thread where the comment they want to delete is located.)
5. Admin clicks on delete thread (or delete comment).
6. On delete thread all comments and thread are removed from the website. (On delete comment, comment is replaced with "[Removed by admin]."

**Case 8: Forgot password**

**Description:** User wants to reset their password

**Steps:**

1. User navigates to CareerCafe website
2. User selects Login button on nav bar
3. User selects Forgot Password in the Login popup
4. Forgot password popup appears, user inputs their email associated with the account
5. System sends an email to the users email including a link to reset their password
6. User follows the link, inputs their new password, and again to confirm
7. User is redirected to homepage with their account logged in

**Case 9: Create comment**

**Description:** User wants to comment on a thread in the Tech Microsoft community

**Steps:**

1. User navigates to CareerCafe website
2. User logs in (see case 6)
3. User browses communities, expands the Tech section
4. User selects the Microsoft community in the Tech section
5. User browses threads and selects one to view
6. User adds the text and image content they want to comment
7. User selects post comment

**Case 10:** Edit user

**Description:** User wants to edit their profile

**Steps:**

1. User navigates to CareerCafe website
2. User logs in (see case 6)
3. User selects their profile from the nav bar
4. User selects user settings
5. User inputs their changes to bio, name, email, password, or profile picture, and selects save changes

## Discussion regarding the design and styles of all pages

The website colours were chosen as a triad on the colour wheel with the main colour being a darker blue. The reason for this is to match the style of other professional employment websites such as: LinkedIn and Indeed.

The layout of the website features a header and a two column layout. The header at the top includes the logo, search bar, login and create account buttons. The search bar allows you to find users, communities, and threads.

The left column varies in functionality depending on where you are located through the side. On the homepage, it lists many of the available communities that you can participate in. Whereas on the userprofile, it displays information about the user along with account features.

The right column also varies in its functionality and contains the main content of the site. It displays all the threads when you are in a community, and when you are in a thread it displays the content along with replies.

## Client-side validation

See HTML, CSS, and JS files.

## Static design and styles of pages

See HTML, CSS, and JS files.

## Examples of each page type in your proposed site

See above figma diagrams and html files.

### Colours:

467EB3 - Dark Blue  
7DC1FF - Light Blue  
FF9C96 - Pink
